

Sample IEA Online Data Services Energy Price Download

The International Energy Agency (IEA) provides an online database of retail energy prices for 33 countries in North and South America, Europe, Middle East, Asia, and Australia/New Zealand. Electricity, natural gas, fuel oil, and LPG prices are available. They are further broken out by sector – commercial or household. Prices are updated quarterly.

Files can be downloaded in CSV or Excel formats. The following example contains one year of electricity prices for Ireland. The price units are €/per MWh (US\$ per MWh are also available). Note that the prices in this example ARE NOT REAL! We don't want to get in trouble with IEA for distributing their data without permission!
